Project Management Foundations: Teams

Harpreet K

| Supply Chain -> Aspiring PM | NextLeap PM Fellow | KPMG Lean Six Sigma Certified | Bitten by AI Bug to build Innovative Products.
Greater Toronto Area, Canada

Summary

I build products that fix operational problems at scale — and I have 9+ years of evidence that great product thinking lives inside operations, not just in a product org. At Canadian Tire, long before I know I was doing PM work: mapping user journeys across 1,200+ retail stores, running structured root cause analysis on fulfillment failures, aligning engineering, carrier, and retail ops teams, and shipping improvements that moved nationwide on-time delivery rates from 72% to 92%. When I stepped into the Product Owner role formally, the transition felt natural — because the instinct was already there. That's the lens I bring to every problem: what's actually broken, who's feeling it, and what's the smallest change that creates the biggest impact. What I bring to a PM role: Operational instinct — I've mapped end-to-end user journeys, identified friction points, and shipped process and product improvements across retail logistics at scale Data fluency — Power BI, Mixpanel, Google Analytics, JDA, P44, REST APIs, advanced Excel Structured problem-solving — DMAIC-trained, Lean Six Sigma certified; I write PRDs the way engineers love to read them Cross-functional execution — I've aligned engineering, logistics, carriers, marketing, and vendor teams around shared OKRs and a clear north star metric More recently, I've gone deep on AI product development through the NextLeap PM Fellowship — shipping production-grade GenAI systems end-to-end: → RAG-based Mutual Fund Assistant — nightly data ingestion pipeline, ChromaDB vector store, FastAPI + Next.js, deployed on Render + Vercel with GitHub Actions CI/CD → AI Ops Automator — Map-Reduce LLM pipeline (Groq + Gemini), custom MCP server, Google Docs + Gmail automation, anti-hallucination KB-grounded prompting I'm actively targeting Senior PM and AI PM roles where supply chain domain expertise meets GenAI product development — building intelligent systems that solve real operational problems, not just demos. India/ Canada-based | Open to remote and global opportunities kharpreet007@gmail.com | LinkedIn | GitHub

Experience

NextLeap

PM Fellow

April 2026 - Present (4 months)

India

NextLeap PM Fellowship (Apr 2026 – Present)

Product Management | AI Product Development

->Intensive, cohort-based PM Fellowship focused on building production-grade AI products end-to-end from problem discovery and user research to system design, prototyping, and deployment.

->Unlike traditional PM courses, NextLeap is build-first: every concept is applied immediately to real product challenges, simulating the pace and ambiguity of a high-growth startup environment.

What I'm building:

Groww AI Ops Automator (Python, FastAPI, Next.js, Groq, Gemini, MCP)
Full-stack AI operations system that scrapes live product and review data, runs a Map-Reduce LLM pipeline to generate weekly intelligence reports, and dispatches content via a custom MCP server over JSON-RPC. Implemented anti-hallucination KB-grounded prompting and PII binary discard for compliance.

Groww Mutual Fund RAG Assistant (Python, FastAPI, Next.js, ChromaDB, Groq, Playwright)
Production-grade Retrieval-Augmented Generation system with nightly automated data ingestion from live sources, PII sanitization, chunking and embedding into ChromaDB, and a FastAPI + Next.js Q&A interface. Deployed on Render + Vercel with a nightly GitHub Actions CI/CD pipeline.

Skills developed across the fellowship:

→ AI Product Management · Prompt Engineering · Context Engineering · RAG · LLM Pipelines · MCP · AI Agents · LangChain · Vector Databases · Embeddings · Fine-tuning

→ Product Strategy · PRD Writing · User Research · Problem Framing · Roadmapping · RICE Framework · A/B Testing · GTM Planning · Funnel Optimization · OKRs · North Star Metric

→ Vibe Coding · Cursor · Claude Code · Replit · API Integration · FastAPI · Next.js · ChromaDB · GitHub Actions · Vercel · Render

Canadian Tire Corporation

3 years 6 months

Dealer Orders Specialist

January 2025 - Present (1 year 7 months)

Mississauga, ON

Led product strategy for emergency order fulfillment operations across 1,200+ retail stores for one of Canada's largest retail networks. Owned the full product lifecycle — from problem discovery and root cause analysis to solution design, stakeholder alignment, and cross-functional shipping.

Key Outcomes:

->Drove a 48% increase in product sales and 18% reduction in urgent order delays through targeted product and process interventions built after structured RCA of 5 critical failure points

->Designed real-time node-capacity dashboards with automated alerting to rapid-response teams, cutting emergency order processing latency by 12 minutes per shift and reducing missed deliveries by 18%

->Shipped an end-to-end order workflow optimization initiative that reduced daily action item turnaround by 18% across logistics, planning, and retail teams

->Built a structured issue-tracking and escalation process for order exceptions, cutting resolution TAT for store ops teams by 24%

->Automated cost benchmarking and supplier evaluation workflows, achieving a 13% quarterly reduction in vendor cost overruns and improving SLA compliance across supply chain partners

TECHNICAL TOOLS: IMS, IMI, WMS, Insight

Execution Analyst

February 2023 - January 2025 (2 years)

Ontario, Canada

Execute data-driven delivery performance using Lean Six Sigma principles

IMPACT:

- 28% improvement in nationwide delivery rates (baseline: 72% → 92%)
- Reduced service delays by 40% through proactive monitoring system

HOW I DID IT (DMAIC Framework):

- DEFINE: Mapped end-to-end delivery journey, identified 5 critical failure points
- MEASURE: Tracked carrier performance, route efficiency, delay patterns
- ANALYZE: Root cause analysis revealed 60% of delays from poor carrier and weather issues.
- IMPROVE: Designed predictive planning (worked with carriers + dispatch teams)
- CONTROL: Used Data driven analytics to monitor performance sustainability

PRODUCT THINKING:

- Treated "on-time delivery" as the core product metric
- Built feedback mechanism to continuously improve the delivery experience

TECHNICAL TOOLS: CP/CN Rail systems, Excel (advanced analytics), Insight, JDA, P44, OTM (Visibility Tracking)

Re-Invent

Founder

January 2024 - Present (2 years 7 months)

Ontario, Canada

Reinvent isn't about starting over — it's about starting better.

Reinvent was created from a place many of us know deeply — that moment when life shifts, certainty disappears, and you're standing at the edge of something new... unsure, scared, but still wanting more.

This page is for anyone who has ever felt the fear of starting over, the hesitation of stepping into the unknown, or the pressure of rebuilding your life from the ground up. Reinvent is not about having everything figured out — it's about having the courage to take the first step even when you don't.

Here, I share honest lessons from real transition moments, simple tools to rebuild confidence, and practical insights on career growth, mindset, and

personal transformation. Whether you're restarting your career, trying to rediscover yourself, or simply wanting to grow — you're not alone.

Reinvent is a reminder that:

You can begin again at any age.

Small steps count.

Reinvention isn't a failure — it's self-respect.

Let's grow together, one brave step at a time.

Rai Dispatch Logistics

Volunteer Staff

January 2023 - February 2023 (2 months)

Brampton, Ontario, Canada

- Supported dispatch operations during peak season
- Applied Lean principles to streamline route planning

LMI Canada

Order desk Administrator

September 2022 - December 2022 (4 months)

Canada

- >Responsible for processing orders and manage sales reports in database and report to the manager
- >Prepare shipping labels, BOL, customs documents(NAFTA) with information required to complete the product order cycle with zero defects
- >Research and Coordinate with vendors in purchasing and stock inventories to meet ongoing demands by using cost comparisons to achieve maximum profitability
- >Follow procedures and system for inventories restocking to fulfil the current and expected demands using QuickBooks inventory restocking sheets
- >Make arrangements for delivery, pick-up, and shipment of orders on time and accountable for organizing safe overseas shipping conveyance and billing customs

Amazon Logistics

Operations Associate

December 2020 - September 2022 (1 year 10 months)

Brampton, Ontario, Canada

- >Enhanced customer experience exponentially through interpersonal skills, assisting in shipment queries and reporting any delays

- > Increased quality control by providing a wide range of quality improvement processes (5s, Andon Approach etc) to ensure quality standards
- > Increased operational efficiency through timely management of merchandise and maintaining records & paperwork in an organized, concise, and timely manner
- > Improved team performance by maintaining a safe work environment and ensuring satisfactory communication ideas to the managers and safety team
- > Increased productivity through training to new employees and adhere to company protocols and present effective written reports to the supervisors

Toys"R"Us

Retail Stock Clerk

November 2020 - December 2020 (2 months)

Windsor, Ontario, Canada

Food Basics

Retail Cashier

June 2020 - December 2020 (7 months)

Windsor, Ontario, Canada

FRESHCO, LTD.

Store Assistant

March 2020 - June 2020 (4 months)

Windsor, Ontario, Canada

Digikaur

Ecommerce Specialist

January 2017 - January 2019 (2 years 1 month)

Gurgaon, India

Managed to handle various e-commerce online portals of clients inclusive logistics services with 3PL vendors across various platforms such as Amazon, Snapdeal, Myntra and Flipkart.

- Used to create strategies, execute plans and follow-up of ways regarding social media campaigns to achieve company objectives
- Created more than 100+ Campaigns on social media for clients to generate revenue and bring brand in the limelight.
- Responsible for creating and curating the content across various social media and ecommerce platforms.
- Set KPI's and SOP's to share with teams as benchmark to evaluate projects, initiatives, social media effectiveness and budgets

Healthians.com

Customer Experience Specialist

August 2016 - January 2017 (6 months)

India

- > Responsible for handling the small projects from customer acquisition to customer satisfaction.
- > Ensured accurate reporting of health packages booked by customers in the panel.
- > Maintained routing and scheduling of 75+ phlebos and logistics team to meet pickups and delivery in the labs as per SLA.
- > Gathered requirements from team members(sales) regarding products and services and forwarded it to execution team
- > Managed the project scope and worked closely with the team to assist them on the constraints.

Omniglobe International Technology Private Limited.

Data Processing Engineer

February 2016 - July 2016 (6 months)

Gurugram, Haryana, India

SANSYS TECHNOLOGIES LIMITED

Network Technician

June 2015 - January 2016 (8 months)

Hoshiarpur, Punjab, India

Education

St. Clair College

International Business Management, International Business Management and Logistics · (May 2019 - August 2020)

Dav Public School

matriculation and intermediate certificate · (1999 - 2009)

Vaish College of Engineering, Rohtak

Bachelor of Technology - BTech, Information Technology · (May 2009 - August 2013)
